

# Mail threats are silent. Your defense shouldn't be.

Every day, critical organizations unknowingly receive mail that could endanger lives or disrupt operations. **TMG SafeMail Mail Screening services** ensure yours isn't one of them.

## Who We Are

Mail is a critical point of vulnerability in today's evolving threat landscape. TMG's SafeMail solution offers secure mail screening without disrupting day-to-day operations.

Whether you're a corporate headquarters, government agency, media outlet, or critical infrastructure provider, we help you detect and prevent physical, explosive detection, chemical, biological, and radiological/nuclear threats before they reach your people.

## Why It Matters

Even a single contaminated letter can halt business, damage brand reputation, or endanger lives. TMG helps you stay ahead of risk while keeping operations running smoothly.

### Continuity without compromise

Screen incoming mail off-site, so you never sacrifice safety for speed.

### Proven protocols

X-ray, visual inspection, and advanced bio-threat screening. Capability to screen for dangerous narcotics including Fentanyl and Opioids.

### Invisible to recipients

Mail arrives safely and normally, no added steps or fear for employees.

### Fast, secure, and compliant

Engineered to meet the standards of DHS, DoD, and national safety guidelines.

## Our Screening Process

1. Pickup → 2. X-ray & Visual Scan → 3. CBRNE Threat Detection → 4. Secure Delivery
